PROFESSIONAL EXPERIENCE

Full Stack Web Developer | ZionClouds | Remote / India

Aug 2025 - Present

- Build and refine service pages, product landing pages, portfolio pages and conversion-focused website sections for WordPress and custom front-end workflows.
- Develop polished WordPress/Elementor-compatible HTML, CSS and JavaScript components with responsive layouts, reusable sections and clean interaction patterns.
- Create and improve product pages for tools such as Zoe AI Bot, SecureScope, Kaarix CRM, RateMint, TurfCRM, CA Firm CRM and JSME Editor with SEO-focused positioning.
- Optimize pages for lead generation, clear information architecture, mobile usability, technical SEO, performance and structured service/product presentation.
- Work across WordPress, PHP, HTML, CSS, JavaScript, Tailwind-style UI, React/Next.js concepts, custom CRM workflows, AI chatbot positioning and dashboard/product experiences.

Lead Developer | Beyondedge | Hyderabad

Aug 2024 - Jul 2025

- Led delivery of high-performance WordPress websites with clean structure, responsive UI, SEO-friendly sections and timely execution.
- Improved website speed, layout quality, user experience and page structure while coordinating with cross-functional teams.
- Implemented UI/UX improvements, landing page sections, service pages and optimization changes aligned with business and marketing goals.

- Maintained quality across design implementation, debugging, responsive fixes, SEO basics and performance-focused website updates.

WordPress Developer | Recykal.com | Hyderabad

Mar 2023 - Jun 2024

- Built and optimized WordPress pages with focus on speed, content clarity, UI consistency, responsive design and maintainable layouts.
- Enhanced website structure, page speed, design presentation and SEO implementation for better visibility and user experience.
- Worked on Elementor pages, WordPress templates, website sections, landing pages and content updates in coordination with marketing requirements.

WordPress Developer | Incorpindustries.com | Pune

Jan 2020 - Mar 2023

- Designed and developed client WordPress websites from requirements gathering to final delivery, including responsive pages and business-focused layouts.
- Improved website performance, UI/UX, SEO basics, page structure and marketing readiness for multiple client projects.
- Collaborated with clients and digital marketing teams to align website builds with campaign tracking, lead generation and content needs.

SELECTED PROJECTS

- **Zoe AI Bot:** Open-source WordPress AI chatbot plugin with RAG-powered answers, Google Gemini integration, website content indexing, lead capture, email notifications and CSV lead export.
- **SecureScope:** Passive website security scanner for HTTPS, TLS, security headers, cookie flags, redirects, metadata files and guided fix direction.
- **Kaarix CRM:** Open-source jewelry and gold brand CRM with leads, customers, catalog, reservations, quotations, live metal pricing, Zoho Books sync and role-based workflows.
- **TurfCRM:** Field Sales CRM for trading and distribution teams with GPS visits, pipelines, follow-ups, Tally billing import, dashboards and reports.
- **RateMint:** Pricing workflow tool for gold, silver, weight-based products and Shopify pricing with making charges, GST and validation checks.
